

With the growing concern and increased number of COVID-19 coronavirus cases worldwide and specifically in the greater Charlotte metropolitan area, we wanted to let you know that Service Team of Professionals (STOP) Restoration is here to assist you if you have a need to sanitize your facilities and/or transportation vehicles. Our team is certified, trained, and we use appropriate hospital grade agents to achieve a cleaner, safer environment. While we understand and support the critical importance of Local, State and Federal Government measures being taken to slow down the spread of the virus, environmental intervention may be necessary to help minimize the spread of respiratory illness. Applying an EPA approved disinfecting agent in your structure can help decrease the likelihood of people becoming ill.

We truly hope that everyone is safe and is able to avoid being affected by this fast-moving virus. In the event that you need assistance in sanitizing your facility we are here to help. We are available 24/7 and can handle property disasters related to water, fire, smoke, mold and biohazard. Our office is centrally located right here in Huntersville. Because of our team's experience, integrity, and commitment to the highest level of customer service, we have the ability to exceed expectations anywhere you have a need and aim to build long-term relationships with our clients.

If you would like to discuss our services or simply discuss how you can best keep your facility safe please don't hesitate to contact us. We are here to answer any questions or concerns. Our commitment to you is that we will be here when you need us! We would love an opportunity to meet with you to discuss your needs and vendor approval process.

Regards,
John Alexander
